

MRSON EQUIPMENST

Full Detailed Project Flow

28 February 2026

1. Order Confirmation (Order Acceptance)

- **Step 1:** The Salesperson creates an **Order Acceptance** document against the customer's PO.(Only Self If they want add against will manage)
- **Step 4:** The Order Acceptance goes into a **Pending Stage/Material Ready**.

2. Inventory & Procurement Checks

Purpose: Ensure the required materials are available before starting production.

- **Step 1:** The Store Person checks the Pending Order Acceptance list.
- **Step 2:** The Store Person checks the **Inventory** to see if the required raw materials/products are present.
 - **Condition A (Material is Present):** If yes, the Store Person instantly routes the order to the Manufacturing department.
 - **Condition B (Material is Not Present):** If no, the Store Person sends a request to the Purchase Department.
- **Step 3 (If B):** The Purchase Department raises a **Purchase Order (PO)** to a vendor against those specific materials.
- **Step 4 (If B):** Once the material arrives, it is logged into Inventory. The Purchase Order status updates to "**Material Received**", and the corresponding Order Acceptance list is updated to show "Material Received".
- **Step 5:** The material is then sent to Manufacturing.

3. Production & Quality Check (3 Stages)

Purpose: Track the physical creation and validation of the product. Once the material is received by Production, it moves through three mandatory stages:

- **Stage 1: Manufacturing**
 - The product is built/assembled using the materials. Once finished, it moves to Testing.
- **Stage 2: Testing**
 - The product undergoes functional/technical testing.
 - *If it fails:* The product is instantly returned to Stage 1 (Manufacturing) for rework.
 - *If it passes:* The product moves to Stage 3 (Quality Check).
- **Stage 3: Quality Check (QC)**
 - The final inspection takes place.
 - *If it fails:* The product is returned back to Stage 1 (Manufacturing).

- *If it passes:* An automatic alert/notification is generated and sent to the Salesperson stating: "Material is ready in production. Send invoice."

4. Outward Dispatch

Purpose: Bill the customer and prepare the approved product for shipment.

- **Step 1:** Once the Quality Is Approved is sent, the order moves to the **Outward Section** and sits in a "Pending" list then user clicks the "**Out Material**"
- **Step2:** There One Drop Down Do You Want Sent To Outward(YES/NO)

Pages Built in Software:

- **Masters Module:**
 - User Master
 - Add Company
 - Component
 - Role Master
 - Product Master
 - Supplier Master
- **Sales Marketing Module:**
 - Dashboard
 - Order acceptance(By Default Self)
- **Purchase Module:**
 - Purchase Order
 - Purchase Bill
- **Stock Module:**
 - Inventory(Store-Section)
 - Inward Entry
 - Outward
- **Production**
 - Manufacturing
 - Testing
 - Quality Check (QC)
